# FIELDHOME is the Regional Leader in Sub-acute, Inpatient Rehabilitation

Fieldhome provides the most aggressive and comprehensive post-surgical rehab program, outside the sub-acute care hospital setting, focusing on four sub-specialties: **orthopedic, neurological, cardio-pulmonary and post-surgical rehabilitation.**

Our specially trained rehabilitation therapists will design a customized 7-day-a-week therapy program that meets your individual needs and will work with you so that your stay at Fieldhome is as beneficial and brief as possible.

We also provide the extra oversight of a Nurse Practitioner. This allows for continuous collaborative communication with our patient's physicians, decreasing the chance of re-hospitalization and minimizing the patient's length of stay.

## Your Private Room Awaits You!

**Fieldhome offers 46 private rooms and bathrooms for our rehab patients.**

National studies show that patients in private rooms have shorter stays and require less pain medication. Single patient rooms have also been found to reduce the spread of infection.

Each of Fieldhome's spacious rooms has its own half-bathroom, a large flat screen TV and complimentary cable, phone and Wi-Fi services. Our Media Room is another comfortable area, tucked away, where you can use the computers, pick out books from our library or watch tv and movies with family and friends. You also have your choice of enjoying your meals in your room, in the Rehab Center's dining room or in a private dining room with your family.

We want your stay with us to be as enjoyable and comfortable as possible. When you arrive at Fieldhome you are assigned a Personal Concierge, who will keep in contact with you throughout your stay to address any needs you may have.
